

Grayling™
Bulk Packaging
Bag-on-a-Roll
Form-Fit Liners

DRIVE EFFICIENCIES IN YOUR OPERATIONS WITH BAG-ON-A-ROLL DRY FORM FIT LINERS

Grayling™ Form-Fit liners are custom designed to fit the dimensions of the FIBC providing maximum filling and dispensing efficiency through complete discharging of dry flow-able products. Unlike a basic “tube liner”, Form-Fit Liners offer dimensions that contour to your container and incorporates a spout diameter and length that best compliments the FIBC’s fill and discharge spouts.

Our bag-on-a-roll form-fit liners are manufactured with perforations between bags providing easy tear off. The consistent presentation provides ease of use for insertion and filling in your operations.

APPLICATIONS

Chemical

- Resins
- Colorants & Additives

Food & Beverage

- Dry Mixes
- Spices
- Sugar & Confectionery
- Vitamins & Supplements
- Nuts & Grains
- Coffee

Our production facility is FSSC22000, Kosher and IMS certified

Bag-on-Roll Form-Fit Liners for Dry Applications

DESIGNED FOR YOUR DEMANDS

We can produce bag-on-roll liners up to 48" square on our fully automated equipment that provides you or your customers with ease of use.

- Each liner is separated by a perforation
- Bags are wound on 4" cardboard cores and shipped via pallet
- Bottle-neck liners provide a sanitary interior to protect your product

Liners are manufactured with film structures designed for your specific application performance needs

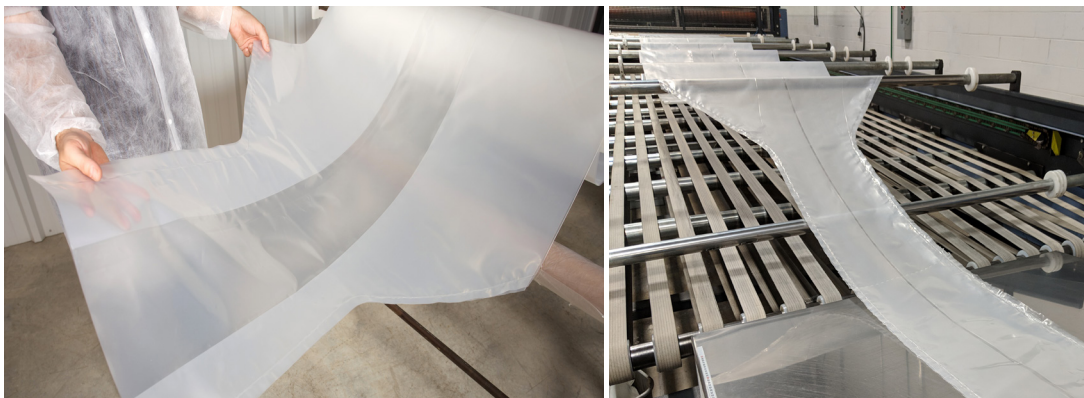

- Moisture or oxygen barrier
- Chemical resistance
- Toughness and durability
- Anti-static properties (L2)

Fill & dispense spouts can be custom designed to optimize performance in a specific manufacturing facility. Spouts are available up to an extended length of 40".
