Therm-Equip, Inc. Glovebags

PROTECTING PEOPLE DURING MAINTENANCE ON HIGH-TEMPERATURE PIPES
Hundreds of thousands of dollars are lost annually in paper mills, power plants, refineries and other industries due to time-consuming maintenance or repairs to hot pipes. Therm-Equip glovebags are the answer. With them, maintenance personnel can work on hot active surfaces up to 700°F.

Therm-Equip’s innovative glovebags make it easy to complete repairs or maintenance in a timely manner, without losing time to shutoffs and cool down periods. Manufactured by Therm-Equip and available exclusively through ILC Dover’s distribution network, they help assure worker safety and uninterrupted productivity.
AVAILABLE BASIC CONFIGURATIONS

- Special order glovebags are not returnable and require a 2-week minimum for production
- Other sizes are available for unique applications: 7296-2 and 72120-2

1 **IDEAL FOR ASBESTOS REMOVAL**

The glovebags’ full-seal design ensures that all asbestos particles are captured safely, falling directly into the bag below.

2 **RUGGED BUILT-IN GLOVES**

Therm-Equip PC300 model liners feature heat-resistant leather gloves, while the PC400 and PC700 models feature insulated leather gloves.

3 **THREE DIFFERENT MODELS**

Therm-Equip glovebags are available in three versions, each offering different heat ratings (300°, 400° and 700°F), and sizes to accommodate pipes of varying diameters from 1” to 30”, and for horizontal and vertical pipes. Custom-designed glovebags are also available for specialized applications.
4 A CINCH TO INSTALL, SEAL AND REMOVE

The PC300 model is constructed of 100% translucent plastic that is affixed to the work area with heavy-duty duct tape, while the PC400 and PC700 models are constructed of heavy-gauge woven fabric, look-through windows and belt-type harnesses that secure the bags to the pipe.

5 EASY DISPOSAL

Once the process is completed, properly remove the bag from the pipe, and secure in an appropriate waste disposal container. For the disposal of asbestos, please consult local laws concerning proper methods for removing, handling and disposing asbestos-containing materials guidance.
CAUTIONS

Therm-Equip high temperature application glovebags are designed as one-time use devices in accordance with federal asbestos regulations. Working on pipe that is elevated in temperature exposes workers to numerous hazards that should be carefully considered before commencing work. A qualified mechanical engineer and safety personnel should be consulted prior to working with this product. Pipe may be under high pressure and can be subject to mechanical failure due to work performed. Leaking steam or gases may be invisible to the naked eye and can cause serious injury or even death. Rapid thermal expansion and contraction can cause additional stress on pipe. Workers should consider all applicable safety precautions for the particular work activities. Wetting agents will emit large amounts of steam if they are sprayed on hot pipes and insulation; therefore, it is recommended that hot removal be performed without wetting. Asbestos containing material can be wetted after they have had sufficient time to cool. The user should determine the suitability of this product for the particular use. Additional information as to use, applicable laws or governmental regulations may be necessary for the user to determine this product’s suitability for the particular use. Since the manner in which this product is used is beyond the manufacturer’s or representing agent’s control, the manufacturer or agent makes no warranty of any kind, express or implied, including the warranties of fitness for a particular purpose or merchantability. The manufacturer or agent does not assume any liability arising out of the use of this product. It is the recommendation of the manufacturer and agent that the user check and conform to all applicable regulations prior to any work.

TALK WITH OUR EXPERTS

At ILC Dover, we look forward to collaborating with you to develop systems tailored to your exact needs. To speak with one of our experts, simply call +1.302.335.3911 or visit www.ilcdover.com.
Innovators at our core, we develop engineered solutions for our customers’ complex problems. Recognized globally for our flexible containment solutions, ILC Dover serves customers in a diverse range of industries, including pharmaceutical and biopharmaceutical manufacturing, personal care, food and beverage, chemical, aerospace, healthcare and government agencies. At ILC Dover, quality is a culture, not a measurement. Our customers will tell you that we cater to their every need and that we’re highly innovative, responsive, dedicated and competitive. We have been innovating since 1947. ILC Dover’s visionary solutions improve efficiency, safeguard workers and product, and prevent disasters — proof that we are on the front line of business excellence.

**Engineering evolution beyond boundaries.**
