Meet the soloLAB containment isolator: Perfect for providing operator protection from hazardous materials or creating inert gas environments at laboratory scale. With its instant “pop up” deployment the soloLAB is ready for use in minutes.

**Closed-Barrier System for Small Scale Operations**

**FEATURES**

- Closed pressure tight construction
- Durable
- Cost effective
- Compact & Portable
- Stable working surface
- Large access zipper
- Dexterous interface

**Closed Pressure Tight Construction**

Fully welded, optically clear PVC film enclosure with gas tight zipper prevents the escape of inert gasses or hazardous materials.

**Compact & Portable**

750mm (29.5276 Inches) square make the soloLAB a compact containment system saving valuable laboratory space. The soloLAB can be packed away in its own compact carry case for ease of storage and transit.

**Dexterous Interface**

Maximum reach and dexterity is assured by the carefully placed arm sleeves and tactile nitrile gloves.

More soloLAB Advantages and Requirements
Safe containment of hazardous materials

Large gas tight zipper

Small footprint means more room for additional laboratory space

Solo Containment is now an ILC Dover LP Company
