

cGMP Raw Materials

The most efficient solution for integrating powder weighing, filling, and dispensing.

ILC Dover is a cGMP raw material and packaging solution provider dedicated to reducing the cost, time, waste, and exposure risk associated with buffer and cell culture media preparations in pharmaceutical and biopharmaceutical manufacturing. We offer two primary packaging options: powder prefilled in ILC Dover EZ BioPac® bags or prepacked in another standard packaging choice. Regardless of your scale of operations, we can provide an economical and flexible solution configured to your exact specifications, volume, system, and so on.

EZ BioPac® packaging is a single-use solution that reduces contamination risks by avoiding dust when preparing large powder volumes. Prefilled, trust-weighted cGMP raw materials in EZ BioPac® integrate industry-leading, single-use powder containment and transfer solutions for safe, clean, and efficient buffer and media preparations.

The ILC Dover Advantage:

- cGMP manufacturing
- ISO 7 and 8 clean room certifications
- Customized packaging at all scales
- 12kg, 25kg, and 100kg standard pack sizes

BENEFITS

Meet rising demands for key cGMP raw materials in biomanufacturing

Avoid labor-intensive powder weighing & packaging

Reduce the risk of chemical exposure & product contamination

Selected cGMP Raw Material & Standard Packaging Sizes

Packaging options to best meet your needs for diverse applications

Raw Material Name		
	Size	SKU
Tris(hydroxymethyl)aminomethane (Tris)	12kg	94001-12kg
	25kg	94001-25kg
	100kg	94001-100kg
Tris(hydroxymethyl)aminomethane hydrochloride (Tris HCl)	12kg	94002-12kg
	25kg	94002-25kg
	100kg	94002-100kg
Sodium chloride	12kg	94003-12kg
	25kg	94003-25kg
	100kg	94003-100kg
Sodium hydroxide	12kg	94004-12kg
	25kg	94004-25kg
	100kg	94004-100kg
Sodium acetate	12kg	94005-12kg
	25kg	94005-25kg
	100kg	94005-100kg
Ammonium sulfate	12kg	94006-12kg
	25kg	94006-25kg
	100kg	94006-100kg
Sodium phosphate monobasic monohydrate	12kg	94007-12kg
	25kg	94007-25kg
	100kg	94007-100kg
Potassium phosphate dibasic	12kg	94008-12kg
	25kg	94008-25kg
	100kg	94008-100kg
Urea	12kg	94009-12kg
	25kg	94009-25kg
	100kg	94009-100kg

BEYOND BOUNDARIES[®]

ILC Dover is a world-leader in the innovative design and production of engineered flexible protective solutions for pharmaceutical and biopharmaceutical, flood protection, personal protection, bulk packaging, and aerospace industries. Our customers will attest to our relentless dedication to high value products, advanced technology, and responsive service, as our visionary flexible protective solutions have improved efficiency while safeguarding people, product, and infrastructure in hazardous conditions since 1947.
